March 10, 2022

You are eligible for 3 CPE credits

Oliver Tavakoli  
Chief Technology Officer  
Vectra

**VECTRA**<sup>®</sup>  
SECURITY THAT THINKS.<sup>®</sup>

# DESCRIPTION OF COURSE

This workshop puts the participant in a security analyst's shoes, navigating an incident that occurred at a spy agency. Participants obtain a first-hand look at a real-world incident through the lens of a Network Detection and Response system and hone your analysis and hunting skills.

This workshop helps sharpen defending skills in a simulated enterprise environment following a step-by-step, moderated path to analyze a real-world advanced attack. The Blue Team Workshop helps individuals better understand how to analyze behavior-based indicators that occur post-compromise. Analyzing evidence without signature matching requires a different way of logical thinking and assessment.

This workshop is a way for individuals to gain free hands-on, interactive virtual training.
